Control professionals vote Triconex top safety systems maker for ninth consecutive year

IRVINE, CALIFORNIA, USA – February 28, 2005 – The Triconex unit of Invensys Process Systems today announced that for the ninth consecutive year *Control* magazine readers have distinguished the company as the best manufacturer of safety shutdown systems for the process control and automation industry. The Triconex unit received 31 percent of the votes in the safety shutdown systems category in *Control's* Readers' Choice survey announced this year, up from 22 percent last year and nearly twice as high as the nearest competitor.

"Users of safety shutdown systems are highly discerning in their vendor choices and the fact that they continually and increasingly choose us as the best manufacturer is strong validation that we are meeting their need for peak system performance. Our superior triple modular redundant system design, continuous technology innovation, precision manufacturing, and unrivaled quality control programs are working well for our customers in meeting their safety and process uptime requirements," said Luis Duran, Triconex Brand Director at Invensys Process Systems.

Control magazine's 14th Annual Readers' Choice Awards represent the opinions of process control professional's on which companies offer the best technologies and best meet their individual needs. The survey gathers end user evaluations of companies in 74 different categories.

Triconex, a unit of Invensys Process Systems, is a leading supplier of products, systems, and services for safety, critical control, and turbomachinery applications.
